Dear Sir:

Applicants hereby petition to make the above-identified application special under MPEP § 708.02, X. The application has not yet been examined.

The present invention relates to a particle beam therapy system (particle beam treatment system) and a particle beam irradiating method used for the treatment of cancer. The particle beam therapy system comprises a charged particle beam generator, a plurality of treatment rooms in each of which an irradiation unit for irradiating the charged particle beam to the irradiation target (cancerous tumor) is disposed, and a plurality of beam transport systems for transporting the charged particle beam emitted from the charged particle beam generator to said respective irradiation units in said plurality of treatment rooms. Further, the particle beam therapy system comprises a control means which decides the sequence for introducing the charged particle beam to the treatment rooms, and forms the beam paths for introducing the charged particle beam to the respective irradiation units in the treatment rooms in accordance with the decided sequence. Therefore, the invention
